

Where does the PIPA effort go from here, and how can you be part of it?

Break-out Session --- November 16, 2007

Suggestions

- Involve all of the interested parties
- Start by identifying the common ground and what is practical
- Recognize that initially there will be no solutions that address all issues
- Develop tools and guidelines that will assist those involved in the process
- Establish a living, dynamic process that will learn, improve and become more complete over time
