Pipeline Safety – Embrace the Conflict

Every Conflict is an Opportunity for Positive Change

New Orleans, Louisiana

November 19th & 20th, 2015

The Promise of Integrity Management

What could possibly be wrong with a system to identify risks, create plans to measure and mitigate those risks, conduct ongoing testing to see how plans and mitigation is working, adapt plans to new information, repeat?

We think it is so great we have been pushing to expand beyond the 6% of Natural Gas Transmission pipelines, and the 48% of Hazardous Liquid Pipelines currently covered.

What I hope we can answer in this session is why the performance does not live up to the promise?

Significant Incidents Per Mile of Hazardous Liquid Pipeline The Integrity Management Years

Within Could Affect HCA Areas Outside of Could Affect HCA Areas
