

Enbridge – Pipeline Safety & Engagement

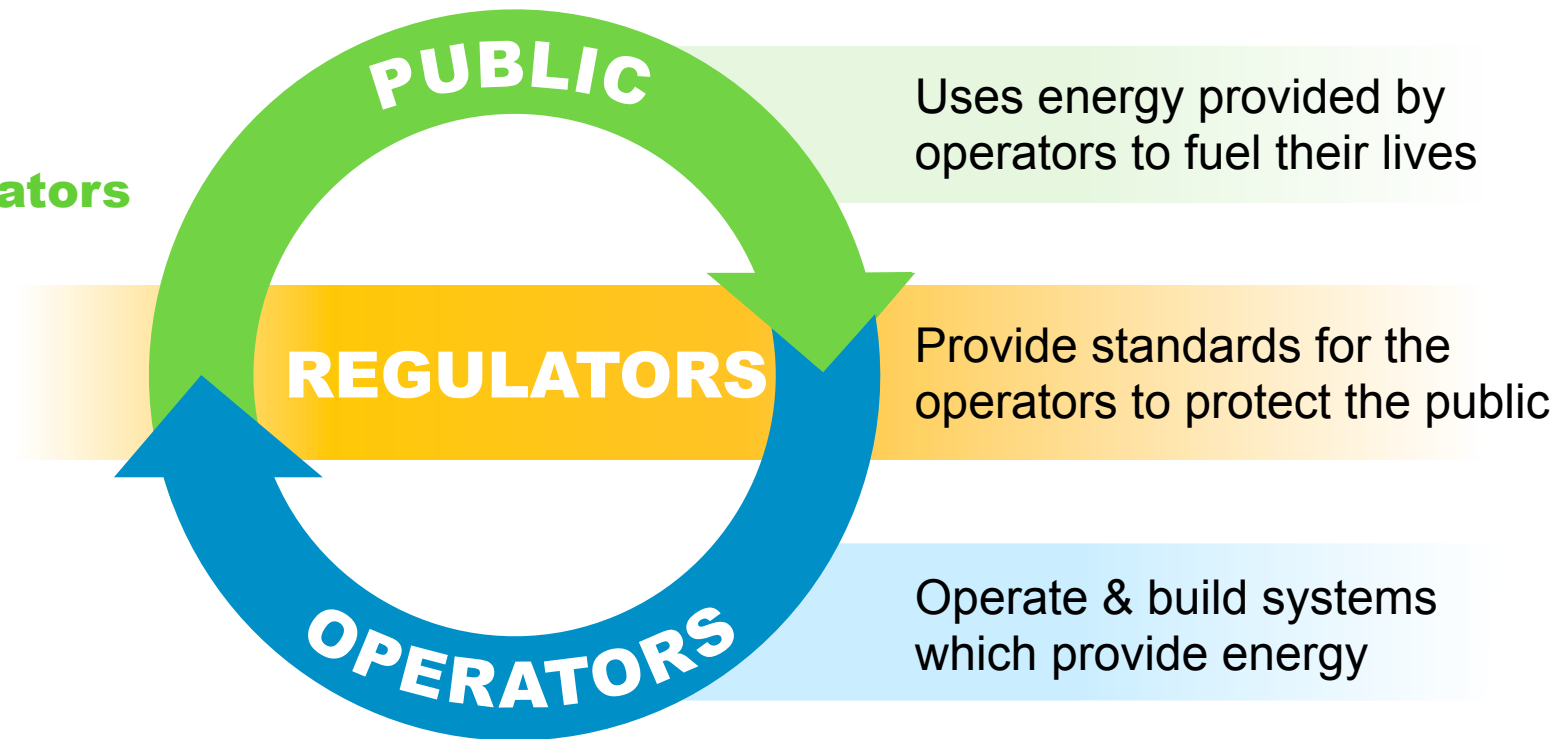

Rick Kivela
Manager, Operational Compliance

How much do we want to engage the Public?

The Public seeks information from operators

Operators owe the public transparency

The public deserves to have confidence in their energy supply

It's a Process, not a Project

Our core values guide us in the process of developing, building, operating & maintaining each asset throughout the lifecycle of the asset

Design | Permit | Build | Operate in the communities where we live for the life of the asset

Enbridge's Core Values: Integrity | Safety | Respect
